

 **LTITUDE**
SKILLS CONSULTANTS

OVERVIEW

As a national entity in innovative professional development, and creativity. Altitude-skills is re-inventing solutions to the upskilling of the 21st Century educators, professionals, students and parents for sustainable societal human development.

Altitude skills work collaboratively systemwide as consultants to provide a wide range of services – creative research, assessment, innovation, evaluation, and brain-based blended technology teaching and learning, ICT- enhanced e-learning technical assistance in the digital age, and policy guidance that are tailored to the needs of our clients. We create and construct knowledge and apply evidence-based expertise to improve and upgrade systems, policies, and practices pragmatically.

There are lots of teachers' professional development programs that the Government and educational stakeholders offer the 21st Century teachers in this technology age. Yet teachers, students, and parents seem to be limited and sometimes frustrated without outstanding results.

This is because 21st Century Teachers need 21st Century Creative Learning and Teaching Skills to add value to their students and draw out the best potential in their 21st Century students to thrive for holistic lifelong academic excellence in the digital age.

OUR PURPOSE

“We upskill and empower educators, professionals, students and parents with 21st century creative brain-based blended technology teaching and learning skills for outstanding performance”

OUR VALUES

Educate,
Motivate,
Innovate

OUR BELIEFS

“Your attitude determines your altitude in life”
“Identifying your ability, potentials, brain wiring and learning styles is the key to outstanding performance”

OUR UNIQUE IDENTITY

Our global network of 21st Century education research consultants, work collaboratively with organizations, schools and institutions to upskill the 21st century educators, professionals, K-12 students, and parents to out-think, out-learn, out-create, and out-perform in the digital age. Enhancing best practice in creative teaching, learning and assessment. We assist educators, professionals, K-12 students, and parents in developing competence in the appropriate and effective use of Information Communication Technology (ICT) tools for outstanding performance.

OUR UNIQUE APPROACH

We specialize in utilizing Brain-Based Blended Technology Teaching and Learning (BBTTL) with world class pragmatic experience for two decades.

Our brain-based blended technology with Emotional Intelligence EI development involves procedural, functional and pedagogical methods including:

- Need analysis, review and feedback on strategic and detailed operational plans
- Onsite visits that will include individual, focus group and large group interviews involving all stakeholders in the school, institution and organization.
- Deploying appropriately our 21st Century creative Teaching and Learning technologies tool and survey instrument to set baselines for the right attitudes and readiness for using our Creative Teaching and Learning Technology tools for optimal performance.

1. Early Childhood learners are equipped with knowledge about their brain and their emotions, and taught to exercise skill in aiding brain hemispheric integration

2. Early Childhood Development ECD educators are equipped with knowledge about brain development at a young age and how to stimulate brain development and the stages of emotional development and how to groom EI in learners

3. Older learners are equipped with understanding and skills in EI to aid optimal brain functioning, learning skills, stress management, career choices and brain hygiene.

4. Parents are equipped with knowledge about their children's EI and brain wiring and how to create a conducive learning environment for optimal performance

5. Educators are equipped with knowledge about learners' unique brain learning preferences to engage them more effectively for efficient and effective classroom transfer of knowledge through BLENDED TECHNOLOGY TEACHING AND LEARNING STRATEGIES.

6. Professionals and individuals in the work place are equipped with a blue-print to develop the interpersonal and intrapersonal competencies that enhances a person's effectiveness and outstanding performance in the work place.

7. Business organizations, educational institutions and individuals are empowered and upskilled to out-perform their competition by developing their unique potential, increase effective performance and facilitate organizational change.
